

1.  $a = 1$ ,  $b = -\frac{1}{2}$  일 때, 다음 중 식의 값이 가장 작은 것은?

①  $-ab$

②  $-a + b$

③  $-a - 2b$

④  $-a^2 + b^2$

⑤  $-a - \frac{1}{b^2}$

해설

①  $-ab = -1 \times \left(-\frac{1}{2}\right) = \frac{1}{2}$

②  $-a + b = -1 + \left(-\frac{1}{2}\right) = -\frac{3}{2}$

③  $-a - 2b = -1 - 2 \times \left(-\frac{1}{2}\right) = -1 + 1 = 0$

④  $-a^2 + b^2 = -1 + \left(-\frac{1}{2}\right)^2 = -1 + \frac{1}{4} = -\frac{3}{4}$

⑤  $-a - \frac{1}{b^2} = -1 - 1 \div b^2$

$$= -1 - 1 \div \left(-\frac{1}{2}\right)^2$$

$$= -1 - 1 \times 4$$

$$= -1 - 4 = -5$$
